1. Method

Our goal is to find and help children who are being forced to beg or to work under harsh conditions by their families... The thanks of children hugging us with their feeble and tired arms is what gives us hope and strength..."

Children are not the 'subjects' of our work, but rather our working partners. We work together with children to promote their self-development as individuals... Network activities and participation programs are primarily conducted together with children, who are our main working partners and friends.

Our association focuses on providing out-of-school education support to elementary school children..." "The prerequisite of a brighter future and brighter faces is giving the best education to our children..."
