1. Introduction

0

0

0

2 Method

2.1. Model of the research

2.2. Work Group

Table 1. Demographic Data related to the students

Variables	Total(f)	Percentage (%)
-----------	----------	----------------

3.1. Their purpose of using digital environments (Such as tablet, computers)**Table 3. Information related to the purposes of using digital environments by students participating in the research**

Purposes of using digital environments	Total (f)	Percentage (%)
--	-----------	----------------

3.2. The problems they faced when using office programs (Such as Word, Excel, Powerpoint) on Computers

The problems the faced when using office programs	Total(f)	Percentage (%)
---	----------	----------------

Table 5 Information relating to the places where students connect to the Internet

Places connected to the Internet	Total (f)	Percentage (%)

Problems encountered on websites	Total (f)	Percentage (%)
----------------------------------	-----------	----------------

Problems encountered on websites	Total (f)	Percentage (%)
----------------------------------	-----------	----------------

Access to information resources	Total (f)	Percentage (%)
0		

Access to information resources	Total (f)	Percentage (%)
0		

3.6. The problems encountered when accessing information

Table 8. Information related the problems faced by participant students of the research

The problems encountered when accessing information	Total (f)	Percentage (%)
O		

3.7. The condition of getting assistance when using digital environments

Table 9 Information on whether or not research participant students get assistance when using digital environment or not

The condition of getting help	Total (f)	Percentage (%)

Result and Discussion
