F
E-mail address

“It
is well known that they (teachers) know that if the student continues like that, they will send him away
and this is it, he is no longer a problem for them.”; “If someone fails in the education system, he is
rejected.”

2. Research Project SDropSy

T *Many of my teachers, I don't like them. There are many who, in my opinion, do not assume their role as professor. When you're a professor, in my opinion, you should love your job, you should make us want to learn."*

2.1. Methodology

E

am passionate about my work, I want to see them (succeed I

He did it very well, his teaching, he was brilliant because he marked a problem for example on the board and if, if the students needed an hour to solve it, he let them this time to solve it

2.2. The relation to knowledge

By the end, is it important that they know how to solve an equation or is it more important to have social skills than knowledge?

2.3. The desire for knowledge and the desire to transmit the knowledge

F

My favorite teachers, you could see that they like their job. It really encourages you to want to go into their class."

If the teacher is

involved as a teacher and wants to do well his course and everything ... and after there is no ... class response or even ... that also discourage them

2.4. Teacher-student relationship and its effect on students' desire for knowledge

"I like that the teachers of languages tell me that I

really well together. F

Teachers do not always have reasons, students are not always right, I think we have to hold together and try to sustain each other."

3. To be continued ...
